Change the business

"IT executives and their staff are being asked to morph from technology caretakers to business brokers."

Ralph Szygenda SVP/CIO General Motors

Bottom line = Top priority

"To keep their jobs technology executives must shift from having a technical capacity to having a business capacity."

Michael Schrage MIT

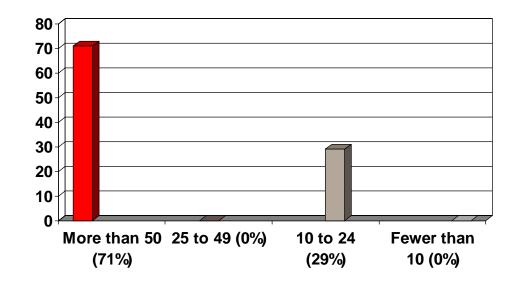

How many projects are in your application backlog?

Marching orders for 2006

- 1. Develop new business capabilities

The new mantra

"Do More, More Quickly"

Jory Morino Heidrich & Struggles

What's the business case for grid computing?

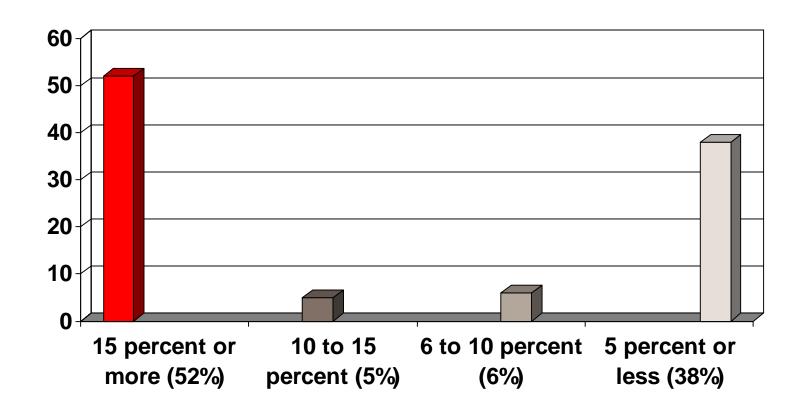

What percent of your installed servers are being used?

Source: CIO magazine Quick Poll

CIO perspective

- "Great for scientific community"
- "Long way to go before business is ready"
- "Difficult to install"
- "Don't like current status of protocols between servers"

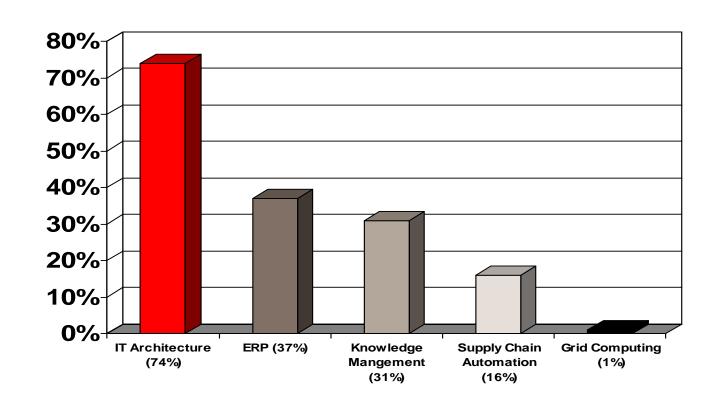

The grid disconnect — The waiting is the hardest part

Technology that supports innovation

Source: "IT-Enables Innovation," CIO, Nov. 2004

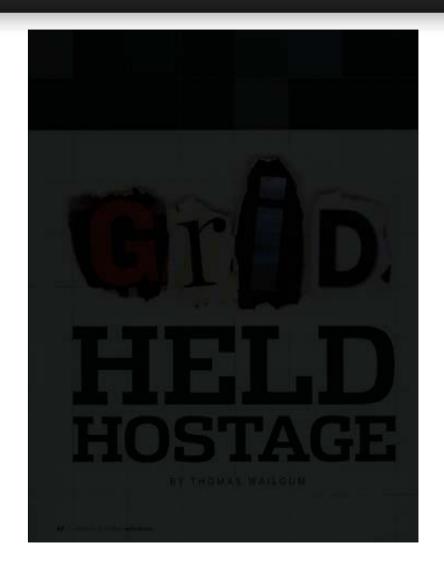

Grid is innovative...

"But innovation is not about what innovators do...
It's about what customers adopt."

"You need grid computing. It could save you millions. It could provide competitive advantage."

CIO magazine August 1, 2005

36 months to mainstream

"The performance of grid computing is awesome." There are real advantages in the long run...about three years away."

CIO

Major Financial Firm

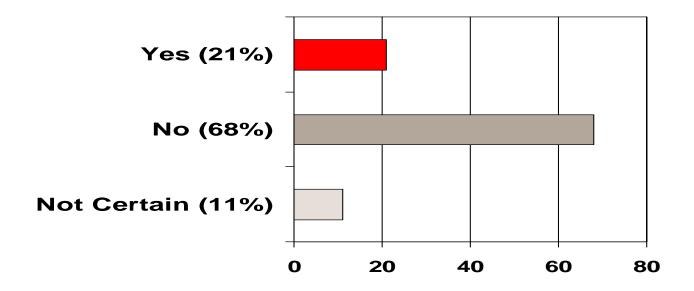

Will your firm be implementing a grid computing architecture in the next 12 months?

Source: CIO.com, Quick Poll, September 9, 2005

Key business challenges

- Money...Theirs
- Money...Yours
- Marketing hype
- Security
- Standards
- Application parsing
- Human resources

Why grids make cents

- 5. Overwhelming application backlog.
- 4. Improve corporate efficiency.
- 3. Do more, with more.
